

Type of accommodation

Student houses and apartments

If you have a preference for living in a student house or apartment, it means you will be sharing some of the facilities with a number of fellow tenants. All locations are in Vlissingen, on a short distance from the HZ University of Applied Sciences, the city center and the boulevard. All our locations have their official permits from the city council and the fire department.

APV has a large number of houses and apartments in different sizes, so varying in the number of tenants per location. In general you will be sharing the facilities with 2 to 6 fellow students. Within these locations there is also room-size and price differentiation.

In the student houses there is a form of social cohesion, this means that often students do things together and make arrangements related to the house. Things like grocery shopping, studying, cooking, doing the dishes etc.

The rooms are usually completely furnished with a bed, table/desk, chairs, television, closet etc.

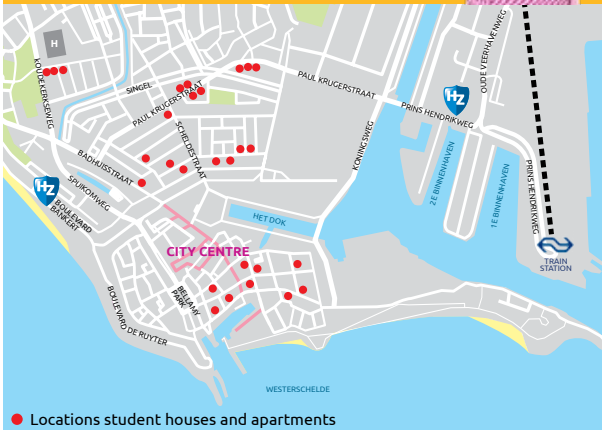

All the houses have an internet connection and the prices will be including the use of gas, water, electricity, cable and internet. Very often the houses have a washing machine and wash dryer.

Once a week the communal areas (kitchens, bathrooms, toilets and hallways) will be cleaned, free of charge as service.

You can also register for these houses with one or more fellow students, APV will then look if it's possible to house you at the same location as your friends.
